TO WHOM IT MAY CONCERN:

TESTIMONIAL ON SUCCESSFUL PROOF OF CONCEPT (POC) – SATELLITE REMOTE SENSING TECHNOLOGY DEPLOYED BY FUTURE EXPLORATION & ENERGY DEVELOPMENT LIMITED/BSD GLOBAL EXPLORATION LLC.

We, Platform Petroleum Limited, have the pleasure to confirm the successful completion of a Proof of Concept (PoC) Project executed by Future Exploration & Energy Development Limited/BSD Global Exploration LLC, which applied their Proprietary Satellite Remote Sensing Technology on one of our operated fields in PML 18 (Egbaoma Field), located in Delta State, Nigeria.

The PoC, which was conducted on July 3, 2023, was designed to evaluate the practical application of advanced satellite-based geophysical methods for hydrocarbon prospect identification and field optimization within the Nigerian Upstream Petroleum Sector.

Future Exploration & Energy Development Limited/BSD Global Exploration LLC provided processed high-resolution satellite data, geologic interpretation, and target delineation that were subsequently reviewed and integrated into our internal subsurface analysis. The dataset provided for the study was of two modes, with one taken from a prospective area and the other from a proven hydrocarbon segment for control. Guided by the insights derived from their result, Platform Petroleum Limited drilled a well in the prospective location, which has been successfully completed and is currently producing commercial quantities of hydrocarbons.

This positive result creates a strong technical correlation between Future Exploration & Energy Development Limited/BSD Global Exploration LLC's remote sensing interpretations and our actual drilling and production outcomes. This proves the technology as a reliable, low-risk, and cost-effective to other conventional geophysical and seismic exploration techniques, offering additional decision-making support in early-stage prospect evaluation.

Thus, Platform Petroleum Limited commends Future Exploration & Energy Development Limited/BSD Global Exploration LLC Technologies for their professionalism, technical expertise, and collaborative engagement throughout the Proof of Concept (PoC).

We strongly recognize their contributions as a demonstration of innovation within

Greystone Tower, 7, Idowu Taylor Street, Victoria Island, Lagos, Nigeria.

the Nigerian Upstream Sector and as a valuable input toward improving exploration success rates through the integration of satellite analytics.

Hence, we are pleased to endorse Future Exploration & Energy Development Limited/BSD Global Exploration LLC Technologies and their Satellite Remote Sensing Solution as a proven technology with clear application potential in Nigeria's oil and gas industry.

Please feel free to contact us should you require any further information or clarification.

Yours faithfully,
